INTRAFIT

intrafit

Intrafit Ltd was set up in the year 2000, though we have been involved in dental cabinetry installations for fifteen years. We have extensive experience in all types of works from very minimalist surgeries and decontamination rooms to the most complex and demanding bespoke projects. We have a strong portfolio of work in the U.K.'s major teaching hospitals.

Our objective is to design, deliver and install the ideal solution to your cabinetry requirements, balancing form, function, durability and cost. It is our promise to you that we will supply and install to the highest standards a product fit for purpose, using superior grade components and built by craftsmen to exacting standards.

As you would expect we give a twelve month warranty with our installations. In addition to this we will routinely return to site after that period to carry out a service (free of charge) for your peace of mind.

We offer a range of materials and colours, designed to compliment your dental chair and of course, all of our surgeries and decontamination rooms comply with all relevant regulations.

Specifications

- Dentistry specific cabinetry - White faced 18mm MDF Carcases- 1mm lipping applied with PUV glue using state-of-the-art machinery to give increased moisture resistance and combat MRSA.

CAD Drawings

Drawing revisions
We will revise all drawings until you are completely satisfied that they fulfill your requirements.

Service Drawings
These are issued to other trades when the design is finished.

3D Drawings
To help with visualisation and colour choice.

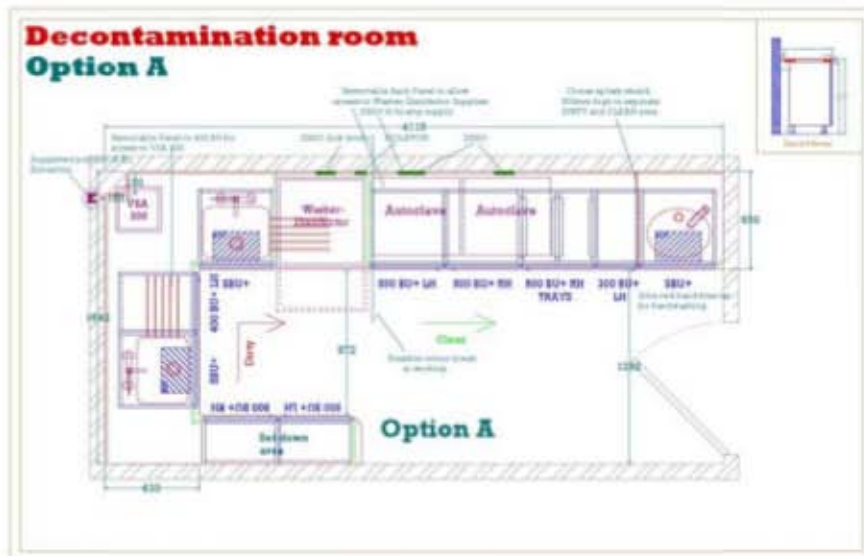

HTM 01-05 Decontamination Area

- Extensive experience of designing and installing HTM 01-05 compliant Decontamination areas.
- Full 'turn-key' service if required. Or alternatively we can work as a cabinetry designer/supplier and co-ordinate with your preferred existing tradesmen.
- We can provide guidance and suggestions for every stage of the project, from inception to design, any building works and final installation and commissioning.
- 2D and 3D drawings to help plan and visualise your Decontamination area.
- We use fully compliant materials, including solid surface worktops, seamlessly integrated sinks and long-lever taps.
- Our portfolio includes rooms for single dentist private practices up to large scale public sector decontamination areas.
- Intrafit has work installed in many of the UK's leading NHS teaching hospitals and private practices.

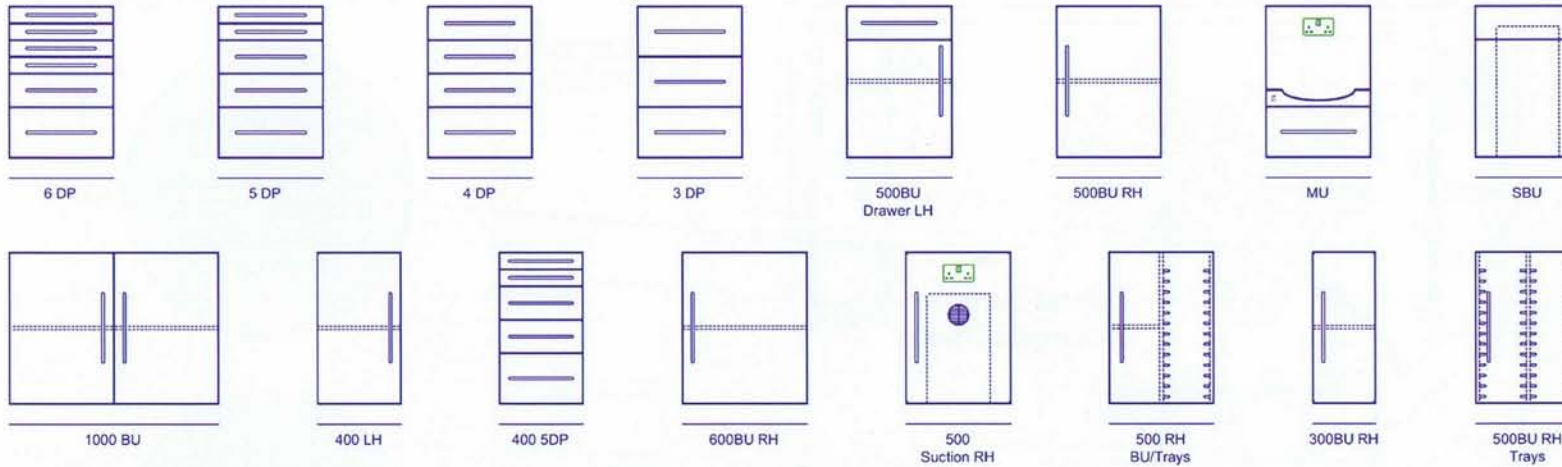

Example 2D PLAN drawings

- We can provide different options for the same room and will revise our drawings until a satisfactory design is reached. Drawings come in PLAN and ELEVATIONS.
- Site visits and meetings can be arranged at your convenience.

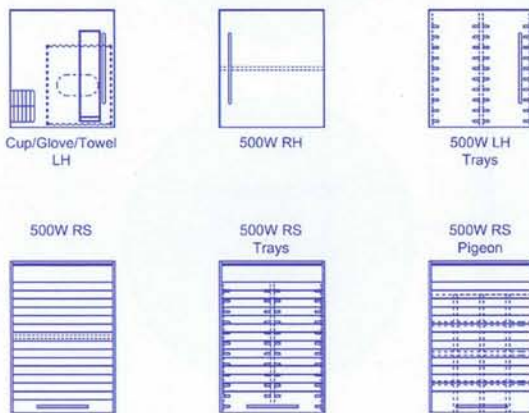

Standard Cabinets

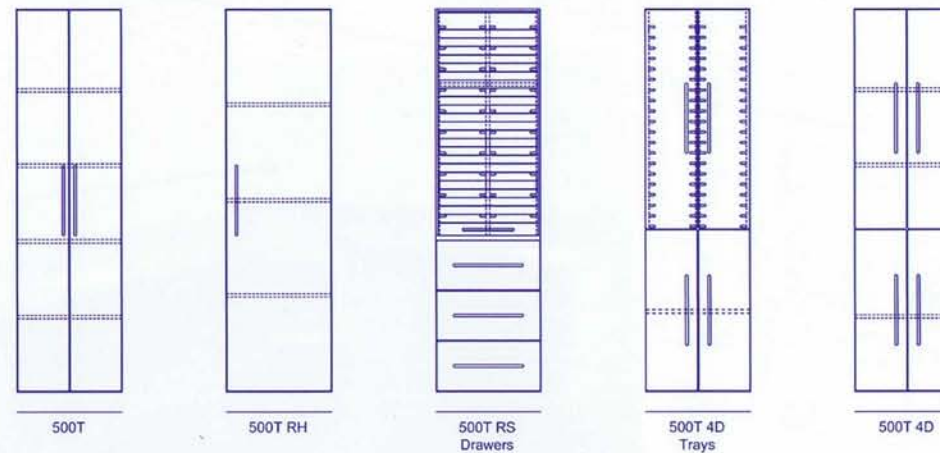

Cabinet Blocks

These are selected standard cabinets. We can design and manufacture any size or configuration of cabinet.

Wall Cabinets

Tall Cabinets

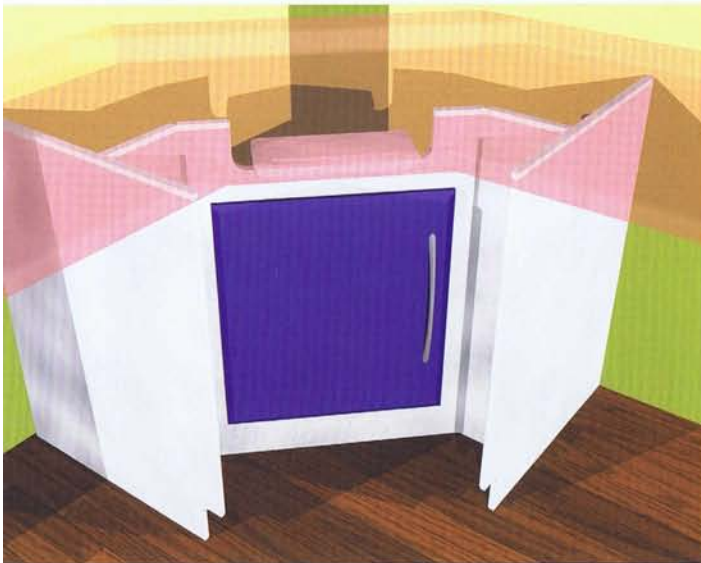

Wall Cabinets (with roller doors)

intrafit | design deliver install

Dental Specific Cabinetry

Our cabinets are designed specifically
for the dental healthcare industry.

Corner Desk Layout

Concealed housing for PC allows easy access and removes cables from the work surface.

Mixer Unit Layout

Nurse's Amalgam mixer cabinet with up-and-over door, pull out shelf and double socket.

Sink Cabinet Layout

The sink cabinet has a solid back with a central removable panel. It is hygienic, tidy and allows for instant access to services.
